Keeta Advertising · Merchant One-Pager · KWT

Get seen. Get clicked. Get more orders.

Advertising boosts your restaurants to better positions on Keeta — in the store list, homepage icons and search. Exposure is free: **you only pay when a customer clicks into your store.**

1

Premium placements, all day

Your restaurant ranks higher in the recommendation list, homepage icon zone and search — high-visibility spots that attract more customers.

2

Free exposure, pay per click

CPC model: every impression is 100% free. A charge happens only when an interested customer clicks to visit your store.

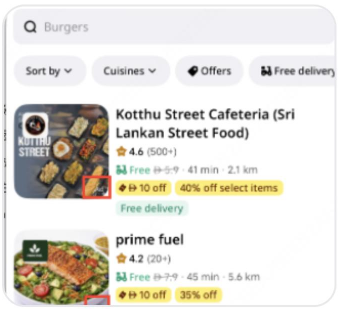

3

Hassle-free setup

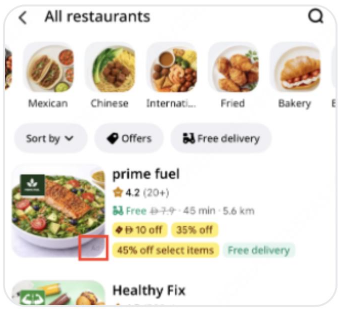

Launch a campaign in a few clicks. Automatic bidding tracks performance and tunes your CPC for the best conversion — no expertise needed.

Where your restaurant appears

1. **Store list & recommendations**
   Your store card jumps to premium positions when nearby users browse for food.
2. **Homepage icon zone**
   A premium spot on the Keeta homepage, seen at the very first glance.
3. **Search channel**
   Rank higher when users search for cuisine keywords like yours.

💰 Your cost — capped & transparent

- **Pay per click (CPC).** Impressions are free; clicks are what you pay for.
- **You set the cap.** Total spend never exceeds your budget — start with the system-recommended amount, adjustable anytime.
- **Weekly or one-off.** Weekly budget auto-resets every Monday; one-off campaigns stop automatically at expiry or when budget is used up.
- **Automatic bidding.** The system adjusts CPC by competition and your budget to maximise conversions.
- **Simple billing.** Daily cost is auto-deducted from earnings at noon next day (T+1); ad vouchers offset part of the cost.

📈 Your return — why it pays off

4x+ Market ROI reference range, varying by category and price band. Ad orders = orders placed within a reasonable session after an ad click.

- **Reach new customers** who would otherwise never see your store — more exposure, more first orders, more reviews.
- **Early-mover advantage.** Keeta is growing fast with a high share of new users — less ad competition and better acquisition value.
- **New-merchant support.** Traffic support in the first 2–3 weeks, plus vouchers and free-trial credit when available — stack with promotions for a bigger boost.

"I'm already on page 1."
Organic rank fluctuates with user behaviour and competition. Advertising locks a stable top spot and reaches new users you'd otherwise miss.

"The ROI looks low."
Exposure is 100% free under CPC. Brand awareness and new-customer acquisition compound over time — don't judge on week one.

"Business is fine already."
Good times are the best time to advertise: strong traffic makes every click work harder, and secures premium spots before competitors spend more.

Ready to boost? Go live in 3 clicks.
